

# URINOL

SUPPORTS URINARY TRACT

## YOU DON'T HAVE TO SUFFER ANYMORE!

Do you want horrible scarring and reoccurring urinary tract problems? If so, then don't take Urinol! Supporting the urinary tract, Urinol works to wipe out urinary tract irritation in little time almost immediately getting rid of any symptoms.

Urinary tract infections are the **second most common infection** in men, women, and children. There are two types of urinary tract infections: bladder infections and kidney infections. The urinary tract consists of the kidneys, ureters, bladder, and urethra. The bacteria E. Coli found in the intestines are the most common cause Urinary Tract Infections. The most common symptoms of a UTI can include:

- ⇒ Lower Back Pain
- ⇒ Cloudy Urine
- ⇒ Blood in Urine
- ⇒ Fever
- ⇒ Inability to urinate despite the urge
- ⇒ Painful urination
- ⇒ Frequent need to urinate
- ⇒ General discomfort
- ⇒ Post urination dribbling (incontinence)

Urinary Tract Infections are more common in women but men and children can get them also. In men, a UTI can be a signal of a more serious problem like prostatitis. The symptoms of a UTI should not be ignored because they can advance and become very harmful and very dangerous.

If you have any urinary tract abnormality, Urinol supports that part of the body. Urinol keeps a stable balance of salts and other substances in the blood. It can normalize the pH of the urine so that infections don't happen as often. Urinol aids in preventing any stones from forming which can cause irritation or infection from occurring.

Upon first signs of bladder irritation take one Urinol twice daily (for a minimum of 10 days). Any abnormality of the urinary tract that obstructs the flow of urine can set stage for an infection. If the condition continues or worsens or if there is any blood in the urine, please see your health care professional.

### Ingredients:

Pumpkin seed Embryos B.E.E.\*  
Barley Bran B.E.E.\*  
Cranberry Extract B.E.E.\*  
Citrin  
Orange Juice Powder

\*Bio Enhanced Extraction™ (Patent Pending)

Microcrystalline Cellulose  
Silica
